

One of the Biggest Updates to the AMA 6th Edition Guides 2024 is Here

Free One-Hour Webinar

6:30pm Central, November 6, 2024

IAIME is hosting a complimentary 1-hour webinar to present updates to the three musculoskeletal chapters of the AMA Guides® to the Evaluation of Permanent Impairment, Sixth Edition 2024. This webinar aims to introduce attendees to the significant changes and provide information on future educational opportunities.

The 2024 updates to the AMA Guides' musculoskeletal content reflect recent medical advancements and evidence-based practices, ensuring that the Guides remain accurate, relevant, and user-friendly. Notable changes include the new Diagnosis-Based Impairment (DBI) tables, which streamline the evaluation process by eliminating previous complexities, such as the grade modifier tables and the net adjustment formula. These updates result in a more accurate, valid, and reliable approach to impairment assessment.

The webinar will cover the essential concepts of the updates and provide an overview of the enhanced DBI Tables, offering valuable guidance for evaluators as they transition to the updated edition. This session is an excellent opportunity for professionals to stay informed and prepared for upcoming changes.

IAIME is also offering a comprehensive 4-hour, in-person '2024 MSK Impairment Guides Course' on Saturday, January 18, 2025, as part of their Annual Meeting. For those unable to attend in person, a virtual registration option is available with access to recorded presentations at a later date. However, please note that the course will not be live-streamed.
